WORK EXPERIENCE

Professional Audio Engineer

Shure Incorporated

2020 - current / Atlanta, GA

- Leveraged Waves Audio Plugins for advanced sound processing, resulting in a significant improvement in audio quality.
- Managed sound reinforcement for 30+ live events, ensuring consistent sound quality and client satisfaction.
- Enhanced vocal recordings with the Shure SM7B, resulting in a **22-hour reduction in post-production editing time**.
- Employed Waves Audio Plugins to fine-tune audio elements, resulting in an improvement in sound clarity and depth.

Acoustic Consultant

Acentech

2017 - 2020 / Atlanta, GA

- Optimized the acoustic design of a concert hall, enhancing sound clarity and reducing sound reflections, resulting in a 28% increase in ticket sales and positive reviews from artists and audiences.
- Integrated Yamaha CL Series Digital Mixers into live sound setups, improving sound quality and streamlining audio control, resulting in a one-hour reduction in setup and soundcheck time.
- Utilized Native Instruments Komplete and Propellerhead Reason to create custom soundscapes for a high-profile art installation, enhancing the overall visitor experience.
- Collaborated with architects and interior designers to incorporate acoustic solutions seamlessly into architectural plans, **saving clients an average of \$7,452** on post-construction soundproofing costs.

Studio Recording Intern

LedBelly Sound Studios

2015 - 2016 / Dawsonville, GA

- Assisted in remote recording sessions by configuring and troubleshooting Source-Connect, facilitating seamless collaboration with artists and producers worldwide.
- Contributed to the creation of soundscapes and audio effects, enhancing the overall quality of recordings.
- Conducted regular equipment maintenance, **saving the studio \$1,021 in repair costs** and ensuring equipment reliability.
- Used Whirlwind Qbox for signal testing and troubleshooting, resulting in a 17% reduction in signal-related issues during recording sessions.
