## EDUCATION

Bachelor of Science

Computer Science with a specialization in Cybersecurity

University of Texas

📅 2009 - 2013

📍 Austin, TX

## SKILLS

- Cisco ASA
- Snort
- Splunk
- Okta
- Qualys
- CrowdStrike Falcon
- VeraCrypt
- Cloudflare
- OWASP ZAP
- Recorded Future

## CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- Certified Information Security Manager (CISM)

## WORK EXPERIENCE

### Cyber Security Architect

#### McAfee

📅 2019 - current 📍 Plano, TX

- Designed a comprehensive security architecture utilizing Cisco ASA, enhancing network security and reducing incident response time by 34 hours per quarter
- Evaluated the effectiveness of OWASP ZAP for vulnerability scanning, uncovering 152 critical vulnerabilities and leading to timely remediation actions
- Implemented VeraCrypt for sensitive data encryption, resulting in enhanced data protection for over 2,321 employees
- Deployed Cloudflare to optimize cloud performance, achieving faster, more secure Internet properties and saving \$70,188 in reliability costs

### Information Security Manager

#### Trend Micro

📅 2016 - 2019 📍 Irving, TX

- Led the deployment of Qualys for continuous vulnerability management, resulting in the identification of over 321 vulnerabilities and significant risk mitigation
- Enhanced real-time threat detection by integrating advanced analytics in Splunk, identifying over 203 security incidents
- Applied Cloudflare's Web Application Firewall (WAF) to 51 applications, contributing to the blocking of over 1.2 million malicious requests per month
- Managed the integration of Okta for identity and access management, streamlining user provisioning and reducing onboarding time by 19 hours per month

### Security Consultant

#### Cisco Systems

📅 2013 - 2016 📍 San Antonio, TX

- Spearheaded the implementation of Snort for network intrusion detection, identifying and mitigating over 403 potential threats
- Optimized incident response capabilities through the integration of Recorded Future, increasing threat intelligence usage by 42%
- Championed the integration of Okta for client identity solutions, maximizing and securing authentication procedures for 15,089 users
- Assessed and optimized endpoint protection strategies using CrowdStrike Falcon, achieving a 39% faster detection rate for threats
