PROFESSIONAL SUMARRY

Results-driven tech leader with 8+ years of experience architecting, developing, and scaling web applications across fintech, healthcare, e-commerce, and enterprise domains. Adept at bridging business goals with technical solutions, I excel in full-stack development using JavaScript, PHP, Python, and cloud platforms like AWS and GCP. Known for driving innovation, mentoring high-performing teams, and delivering robust, user-focused products. Passionate about continuous improvement, automation, and building platforms that empower both users and businesses.

PROFESSIONAL EXPERIENCE

Company 6, Location 2   Sep 2024 – June 2025
Lead Technical Consultant
- Architected and led the implementation of scalable, AI-driven web applications using Node.js and React.js, powering a next-generation platform focused on Fair Stakeholder Experience (FSx).
- Designed and optimized backend services and APIs, ensuring robust, high-performance deployments on AWS for superior stakeholder outcomes.
- Mentored and grew a dynamic development team, elevating code quality through regular code reviews and best-practice adoption, resulting in a 30% reduction in production issues.
- Translated complex business needs into actionable technical strategies by collaborating closely with product managers and stakeholders, accelerating innovation cycles by 25%.
- Drove continuous improvement through rapid Proofs of Concept (POCs), keeping the product on the leading edge of technology and market demands.
- Enhanced platform scalability, security, and system speed, delivering a seamless balance between functionality, performance, and user experience.

Company 5, Location 2   Jul 2021 – Sep 2024
Software Development Engineer 2
- Developed and maintained customer-facing products using ReactJS and Node.js, supporting 100K+ end users.
- Automated testing and data extraction tasks with Puppeteer, reducing manual QA effort by 40%.
- Improved internal tools and workflows, leading to a 25% increase in team productivity.
- Deployed scalable solutions on AWS and optimized MySQL queries, enhancing application performance and reliability.
- Elevated code quality standards through SonarQube integration, decreasing critical bugs by 30% release-over-release.

Company 4, Location 2   Sep 2019 – Jul 2021
System Analyst
- Enhanced user experience for Abbott's flagship e-commerce platform in Germany, leading to a 20% increase in customer satisfaction scores.
- Leveraged PHP frameworks (Laravel, Magento) and ReactJS to deliver new features, accelerating release cycles by 30%.
- Integrated Adobe Experience Manager (AEM) for content management, reducing page load times and improving SEO performance.
- Collaborated with cross-functional teams to implement UX improvements, contributing to a 15% increase in repeat user visits.
